

ANTI-UV SOLUTION!

Sikafloor®-317 UV

Clear, matte, non-yellowing, aliphatic polyurethane and water-based top coat, with a UV blocker technology for floors and walls.

THE ADVANTAGES

- Unique clear UV blocker technology provides superior ultra violet light screening properties that significantly improves colour retention values of underlying resin floor systems.
- Low odour formulation suitable for application in occupied facilities.
- Quick curing, tack-free and hard in less than one (1) hour for fast return to service.
- Good abrasion and impact resistance.
- Meets the requirements of CFIA for use in food plants.

WHY CHOOSE SIKA'S UV BLOCKER TECHNOLOGY?

- Sikafloor®-317 UV clear will not only protect the top coat from UV, but the entire system on which it is applied.
- In order to maintain the aesthetic of your floors.
- To avoid deterioration and discoloration of the floors due to a prolonged exposure to UV light.
- To prolong the lifetime appearance of your floors.
