

SIKA AT WORK

FLOORING FOR THE BISCUIT FACTORY OF TAYYAR YATIRIM, TURKEY

FLOORING: Sikafloor® MultiDur, Sikafloor® PurCem

BUILDING TRUST

FLOORING FOR THE BISCUIT FACTORY OF TAYYAR YATIRIM, TURKEY

PROJECT DESCRIPTION

The investment group Tayyar Yatırım, has chosen Sika as a flooring solution provider for the new biscuit factory investment located at Karaman Organized Industrial Zone.

PROJECT REQUIREMENTS

The process of food production requires not only high temperature and chemical resistance but hygiene for the flooring solutions. PurCem®, since it has a characteristic advantage of being able to serve under extreme temperatures (eg. In between -40°C and +120°C) and having low VOC particle generation, it has become the most efficient and sustainable solution compared to the competitions. In addition to this, approvals given by the food authorities such as British Standards Specifications (BSS), Canadian Food Inspection Agency and USDA make PurCem® system range the most sustainable and proper flooring solution for the project. Last but not least, Sikafloor® MultiDur ES-23 has been chosen, since it has good biological resistance in accordance with ISO 846 and has a CSM Statement of Qualification in accordance with ISO 14644-8.

SIKA SOLUTIONS

The 25,000 m² warehouse area is covered with Sikafloor® MultiDur ES-23, since it has very high mechanical resistance; the floors of the 6,000 m² production areas are covered with high temperature and chemical resistant system, namely Sikafloor® PurCem® HS-21. The solution for the 6,500 m² floors with textured coating requirement is Sikafloor® MultiDur ET-13.
