FLOORING: Sikafloor® MultiDur ET-14, Sikafloor® MultiDur ES-23, Sikafloor® PurCem® HB-21

BUILDING TRUST

FLOORING SOLUTIONS FOR BEVERAGE INDUSTRY

PROJECT DESCRIPTION

Project name: Coca Cola Amatil
Location: NSW, SA, Vic and WA, Australia
Construction year: 2012

CC Amatil wanted to embark a national upgrade of bottling lines in all of their production facilities. Bottling line upgrades have been installed in Sydney, Melbourne, Adelaide and Perth. Sika Australia met with the engineering and project management team to formulate a national specification. Following successful installations in their Sydney plant was presented a specification blueprint for the sites nationally.

PROJECT REQUIREMENT

Independent testing was commissioned to confirm the compatibility of the Sikafloor® systems with the client products. VOC and long term exposure levels were tested resulting in the three Sikafloor® options in the National specification being cleared by CC Amatil for use in their plants.

Turnaround time and Sika recommended experienced Flooring contractors on these short time projects was a vital element.

SIKA SOLUTIONS

Systems: 3-option approach was offered: light, medium and heavy duty options suited to different sections of the plants.

Light: Sikafloor® MultiDur ET-14
Medium: Sikafloor® MultiDur ES-23
Heavy duty: Sikafloor® PurCem® HB-21

In each project Sika's technical and project personnel held pre project meetings to evaluate the specific local requirements of each site with CC Amatil project engineers.

PROJECT PARTICIPANTS

Project owner: Coca Cola Amatil
Contractors: Clifford Flooring, Poly-Tech Industrial Services, Able Industrial Flooring, Antiskid Industries
Sika organization: Sika Australia Pty Ltd

Our most current General Sales Conditions shall apply. Please consult the most current local Product Data Sheet prior to any use.
